

The Radiology of Trauma

with
John Miller, DC, DACBR

Review the types of conditions that you don't see every day but can't afford to miss. Dr. Miller will present a variety of spinal/skeletal fractures and discuss the mechanisms of injury. Advanced imaging methods will be included.

We will also look at the evaluation of spinal ligamentous injuries in the context of instability and "altered or loss of motion segment integrity"

Dr. Miller is a residency trained Chiropractic Radiologist in Seattle who directs a radiology lab, reads imaging, and teaches seminars for doctors and technologists.

When: **May 4-5, 2019**
