

6 Hr Continuing Education for Doctors (In person)

"The Radiology of Joint Disease"

Adjusting the articulations of the human skeleton, especially the spine, is the foundation of treatment in Chiropractic. The Radiologic evaluation of these articulations is often a critical part of patient assessment. This class will be a review of the more common afflictions of bone and joints as seen on Diagnostic Imaging (primarily x-ray).

Taught by: John S. Miller, DC, DACBR
(Former clinician now dedicated to Chiropractic Education)
